

ColorJet Printers

Affordable, photo-realistic full-color parts,
in record time with ProJet® CJP 3D printers

Best known for its unparalleled color capabilities, 3D Systems' family of ProJet CJP x60 3D printers can deliver your models faster, at low operating costs.

Make Your Designs Stand Out

Improve communication, increase innovation, reduce development costs and accelerate time-to-market with ColorJet Printing

FULL-SPECTRUM COLOR

Produce high-resolution photo-realistic color models with full CMYK capability to better evaluate the look, feel and style of product designs, without paint. Multiple print heads provide the best range of accurate and consistent colors, including gradients.

LOW OPERATING COSTS

Based on reliable and affordable ColorJet Printing (CJP) technology, ProJet CJP x60 printed parts cost a fraction of competitive technologies. Featuring efficient material use, you eliminate waste and reduce finishing time as no supports are necessary and unused core material is recycled.

HIGH SPEED COLOR 3D PRINTING

CJP technology allows fast print speeds to deliver models in hours, not days, so you can generate multiple iterations at the same time or large parts faster. Its high throughput supports an entire department with ease.

SAFE AND ECO-FRIENDLY

Closed-loop powder loading, removal, and recycling of natural products based build materials make it eco-friendly and safe to use. There are no physical support structures to remove with cutting tools or toxic chemicals.

Turbocharger concept model, with each component color coded for easy identification

Complex models, like this heart, can be printed with gradients on 3D Systems CJP printers

CJP parts realistically represent the final product's design intent

ProJet® CJP x60 Series

True full-color printing, speed and affordability

With some of the fastest print speeds available, the ProJet CJP x60 Series can transform your ideas into photo-realistic concept models and prototypes in hours, at up to 7x lower part cost than other technologies.

WIDEST COLOR SCHEME - Select from a range of printers and associated color options, from monochrome printing to professional quality color with full CMYK, to create stunningly beautiful, full-color parts.

HIGH THROUGHPUT - With up to 5x–10x faster print speeds than other technologies, you can build large or multiple models at the same time in hours. Increase throughput with the stacking and nesting capability and select the “Draft” printing mode on Pro models to print up to 35% faster.

GENEROUS BUILD VOLUMES -

Access full color 3D printing with the large capacity ProJet CJP 860Pro.

Large-scale architectural models can be printed in one piece

VisiJet® PXL Materials for a Variety of Applications

3D Systems ProJet CJP x60 3D printers use VisiJet PXL materials to build realistic, high-definition, full-color concept models, assemblies and prototypes. Parts can be sanded, drilled, tapped, painted and electroplated, which further expands the options available for finished part characteristics.

Choose from a range of finishing options to meet your application requirements, from ColorBond infiltration for stronger functional prototypes to wax for creating concept models quickly, safely and affordably.

VisiJet PXL + Salt Water infiltrant, ideal for very economical monochrome models

VisiJet PXL + ColorBond infiltrant for improved strength and color vibrancy of this bicycle seat model

VisiJet PXL + Wax infiltrant for fast, affordable, beautiful color models

VisiJet PXL + StrengthMax infiltrant to dramatically improve the strength of this paint gun ergonomic prototype

COMMUNICATION MODELS

3D print text labels, logos, design comments, or images directly onto concept and presentation models.

MEDICAL MODELS

Realistic 3D models reduce operating time, enhance patient and physician communication, and improve patient outcome.

Courtesy of WhiteClouds

ARCHITECTURAL AND GEOSPATIAL MODELS

Beautiful, highly detailed architectural and geospatial models improve communication and speed decision making processes.

INDUSTRIAL DESIGN VALIDATION

Rapid design iteration, evaluation and refining, including finite element analysis (FEA) results and assemblies.

EDUCATIONAL MODELS

Engage students by bringing digital concepts into the real world with 3D color models that they can hold in their hands.

ENTERTAINMENT AND ART PIECES

Produce stunning custom avatars, figurines, collectibles and more creations, with ease.
